Jabra Elite 10 - Cream

How do I pair my Jabra earbuds with my computer using Windows Swift Pair?

Prerequisites

- Microsoft Windows 10 or higher

To pair your earbuds with your Windows computer using Swift Pair, follow these steps.

1. Ensure that Microsoft Swift Pair is turned on in the **Bluetooth and other devices** setting on your computer.
2. Turn on your earbuds by removing them from the charging case. Alternatively, simultaneously press the **Left** and **Right** buttons.
3. Wear the earbuds and simultaneously press and hold (3 seconds) the **Left** and **Right** buttons until you hear the pairing notification. The earbuds are now ready to pair with your computer.
4. Place the earbuds close to your computer. In the Windows notification that appears, select **Connect** to start pairing.

Note

If you want to use just one earbud, you must still pair both earbuds with your computer. After the pairing, you can place one of the earbuds in the charging case.

If pairing is not successful, try the pairing steps again, or try pairing with a different Bluetooth device.
