# Jabra Elite 10 Gen 2 - Cocoa

## How does sleep mode work on my earbuds?

**Prerequisites**
- Jabra Sound+ - iOS
- Jabra Sound+ - Android

When your Jabra earbuds are not in the charging case, they will automatically turn off to conserve battery in the following circumstances.

- The earbuds are out of range of your mobile device for 15 minutes.
- The earbuds have been inactive for 30 minutes.

To exit sleep mode, press and hold (2 seconds) the **Left** and **Right** buttons. Alternatively, place them in the charging case and then take them out again. You can adjust the sleep mode settings in Jabra Sound+.

Download Jabra Sound+ from Google Play to your Android device or from the App Store to your iOS device.
