

Jabra Evolve2 40 SE USB-C/A, MS Mono

How do I manually turn on/off the busylight on my Jabra Evolve2 headset?

When you are wearing the headset and on a call, the busylight automatically lights up red to indicate that you are busy.

To manually turn on/off the busylight, simultaneously press the **Volume up** and **Volume down** buttons on the right earcup.

For Microsoft Teams head variants, manually turning the busylight(s) off will only affect the red LED(s). The purple LED(s) cannot be manually turned on/off.

Note

You can configure busylight settings in [Jabra Direct](#) on your computer.
