

Jabra GN9330e With GN1000 Remote Handset Lifter

How do I connect my Jabra GN9330e to a desk phone?

Follow these steps to connect the phone:

1. Remove the handset cable from the phone, and then connect it to the base socket that is indicated by the handset symbol. Important: This step is only necessary if you are NOT connecting the Jabra GN9330 to an existing headset port.
2. Connect the standard supplied cable to the base socket that is indicated by the phone symbol. Connect the other end of the cable to the headset socket of your phone, or to the handset socket of your desk phone if it has no headset port.
3. Insert the power adapter into the base.
