Jabra Motion UC MS

What are automatic firmware updates?
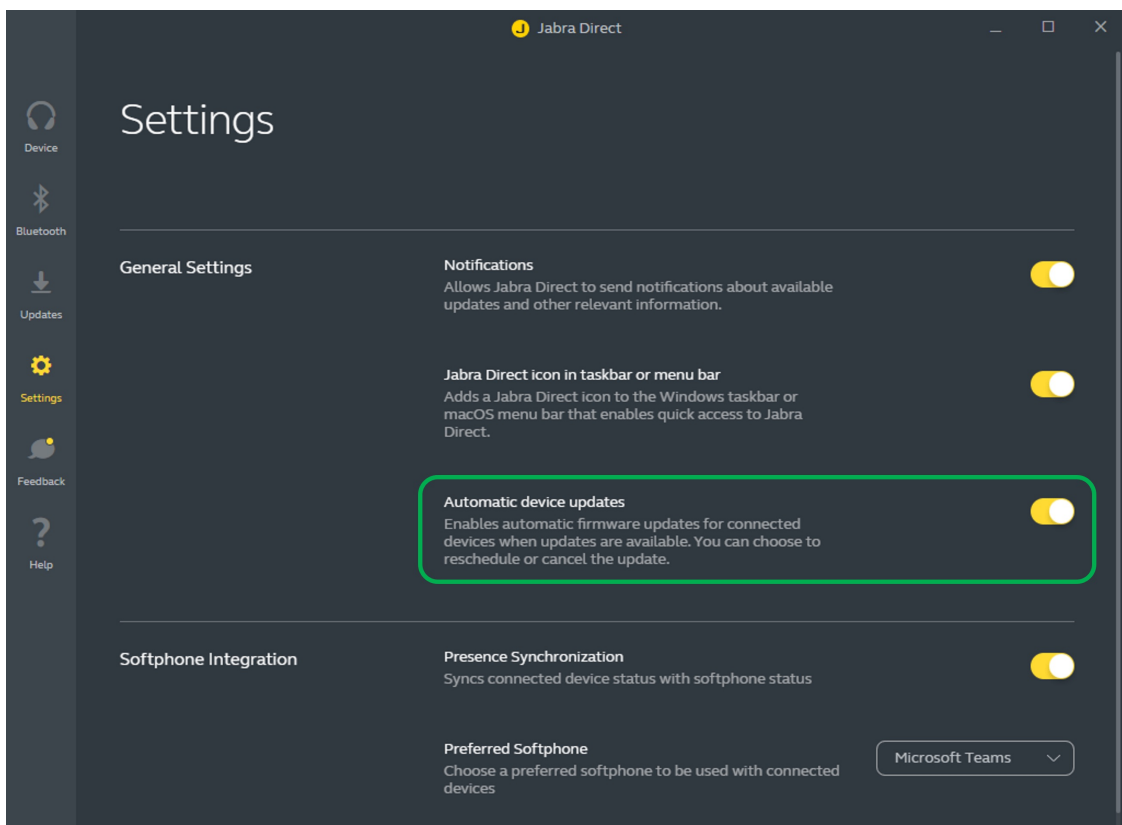

Prerequisites

- Jabra Direct - latest version

Automatic firmware updates are a Jabra Direct feature that enables connected Jabra devices to be automatically updated to a later firmware version.

For standalone instances of Jabra Direct, automatic firmware updates are on by default. To change the setting*, follow these steps.

1. In Jabra Direct, select your device.
2. Click **Settings**.
3. Select **Automatic device updates** to turn the setting off or on.

Note

*If a Jabra device is managed in Jabra Xpress, this setting may not be available for individual users to change.
