

Jabra Pro 930 MS

How do I connect a new primary headset to a base that is used with multiple headsets?

Select one of the following methods:

- If your previous primary headset is turned off, dock the new primary headset and wait until the **Battery** icon turns green (this can take up to 1 minute).
- If your previous primary headset is turned on, dock the new primary headset, and then press and hold the **Answer/end** button for approximately 1 second until the **Battery** icon turns green (this can take up to 1 minute).

Note: The base needs to be turned on when you dock the new primary headset.
