

Jabra Stealth UC

How do I optimize the audio settings for listening to music and watching videos?

You can optimize audio settings for your headset on multiple devices.

Computer - audio

If you connect your Jabra product to a computer, make sure to adjust the computer's audio settings to suit your preferred audio.

Computer application - audio

Many computer applications have their own audio settings. If you connect your Jabra product to a computer, check and adjust the application's audio settings to improve the audio experience.

Computer and Jabra product – maximum speaker volume

If you connect your Jabra product to a computer, the computer's audio setting for maximum volume may be disabled by default to ensure hearing protection standards. Additionally, Jabra product features for hearing protection, activated on the product or in Jabra Direct (if applicable), may also limit the maximum speaker volume.

Desk phone – maximum speaker volume

If you connect your Jabra product to a desk phone, check and adjust the speaker volume setting on the desk phone to improve the audio experience. Additionally, check and adjust the speaker volume setting on the Jabra product.
