

Jabra Speak 810 UC

How do I position the Jabra Speak 810?

The Jabra Speak 810 is designed for mid-sized meeting rooms. Place it on a level surface in the center of the table, and take care not to cover the microphone or speakers. For optimal audio quality, avoid placing other objects too close to the Jabra Speak 810. Objects may reflect the sound and cause poor audio quality or an echo.
