

Jabra Sport Pulse Wireless

Why does my headset keep connecting to another device?

If you use your headset near other devices that have Bluetooth® Smart enabled, it is possible that another user accidentally selected your headset instead of their own when attempting to connect to their device. To prevent this from happening, disable Bluetooth Smart by using the following steps:

1. Turn on the headset.
2. Press and hold the **Sports** button (approximately 10 seconds) until a voice prompt indicates “Bluetooth Smart on” or “Bluetooth Smart off”.

Note: When disabling Bluetooth Smart, you can only use the heart rate monitor with the Jabra Sport Life app. It will not work with third party apps.
