

A NO FRILLS TELEPHONE SOLUTION FOR CONTACT CENTERS

JABRA DIAL 750

Jabra Dial™ 750 is a telephone dial pad that paired with a Jabra headset provides a fully functioning single-line telephone that connects directly to any wall-jack. Jabra Dial 750 provides a smooth and cost-effective migration path for growing contact centers and is ideal for anyone who wants to use up minimum desk space for a telephone/headset system.

The ergonomically designed dial pad features a big keypad, mute light, adjustable speaker and microphone volume as well as redial buttons that reduce the stress of repeated manual dialing. Unique supervisor port enables easy agent training and call monitoring.

EASY SET-UP

Connect the Jabra Dial 750 to your existing standard telephone wall jack. Attach your Jabra headset and you're hands free.

USER-FRIENDLY CONTROLS

On/off, big keypad, flash and redial buttons make it easy to dial and receive calls. Also features adjustable speaker and microphone volume buttons.

SUPERVISOR PORT

Unique supervisor interface enables easy agent training and call monitoring.

MUTE LIGHT

In-use mute LED indicator provides excellent call visibility when you are on a call.

FEATURES	BENEFITS
Volume Control	Full control of the speaker by simply sliding the volume control to a preferred setting
Microphone Volume Control	Adjust the microphone volume to make sure that you can be heard
Ergonomic Design and Buttons	An oversized keypad with large and user friendly buttons enables comfortable and ergonomic use
Mute Function	Mute or unmute your microphone when you do not want people to hear you for a moment. A mute LED indicator will indicate when your microphone is muted
Memory Keys	Store important numbers in the memory keys for quick access to important numbers
